

## **Important Notice**

This is to inform that the Medical Council of India is receiving communications in different languages from the States all over India. There is a delay in the redressal of these issues marked in the local languages, as they are difficult to understand and comprehend. The Council has to depend upon the various translators (which are not readily available with the Council) to translate these communications. We would request the State Councils, institutions and individuals to kindly mark all communications to MCI preferably in Hindi/English language for the timely addressal.
